

SMART WOMEN DEFEND SYSTEM

PROBLEM STATEMENT:

In Today's World, Women face a lot of Security/ Harassment problems. In this 21st century, we have a lot of information which is regarding the Women threat to Security. A Prime Question which evolves in every Woman's mind is about her safety. A Woman faces Security Problems in many areas such as night travel, workplace, etc.

ABSTRACT:

In order to overcome the above problem, a Safety Device is been built in order to activate electric shock and Sprinkle water for self defend purpose, when a push button is been inputted. Additionally alarms and lights are operated in order to indicate the near ones and message is been sent to police relatives that the regarding person is in trouble along with their location.
